

Joshua Menezes

Software Developer

Mumbai, India | +91-9769830747 | joshuamenezes65@gmail.com | linkedin.com/in/joshuamenezes- | github.com/Juiceyyyy

SUMMARY

Software Engineer (Computer Engineering, Honors in Cyber Security) with range across full-stack development (React, Next.js, Node.js, Flutter), data engineering & cloud (Informatica, Snowflake, SQL, AWS/GCP/Azure), and applied AI/ML - from computer-vision systems to quantitative trading models. Ships production-grade systems end-to-end and uses AI-assisted development workflows to move faster without cutting corners. Anthropic Claude Certified (Developer, Architect - Professional, Associate).

EXPERIENCE

Software Developer

Aug 2025 - Present

Capgemini

- Completed structured technical training in UNIX, Python, SQL, Informatica and Snowflake as part of Capgemini's onboarding program.
- Built and support ETL/ELT pipelines for enterprise data warehousing and cloud migration engagements using Informatica and Snowflake.

PROJECTS

WhatsTheOdds - Sports Intelligence Platform

Multi-bookmaker odds comparison, bet tracking, and match-outcome prediction platform

- Built a full-stack platform for multi-bookmaker odds comparison and bet tracking, with a prediction engine that analyzes historical and live sports data to forecast match outcomes - validated live during the FIFA 2026 World Cup.
- Designed the full database schema around a 300k+ historical match dataset; implemented Supabase Auth and Stripe Payment Element for monetized, authenticated access.
- Stack: Next.js, FastAPI, Supabase (PostgreSQL), Stripe

Systematic Trading System - NSE Equities

Multi-signal quantitative strategy benchmarked against the Nifty 50

- Designed a multi-signal systematic trading system combining ARIMA-EGARCH volatility modeling, Kalman-filter pairs trading, HMM regime detection, and LightGBM/LSTM forecasters into an HRP-weighted ensemble.
- Backtested the strategy to 38 - 40% returns, outperforming the Nifty 50 benchmark over the test period.
- Stack: Python, pandas/NumPy, scikit-learn, statistical & ML forecasting, Pine Script (TradingView)

FaceTrack - Real-Time Human Tracking System

Multi-feature human detection and recognition using deep learning and Q-learning for dynamic environments

- Achieved 98% facial recognition accuracy using FastAPI, OpenCV, and InsightFace.
- Built multi-angle registration capturing 5 facial profiles per user, reducing false negatives by 40%.
- Stack: Python, OpenCV, InsightFace, FastAPI, React, Supabase

Additional Projects: UniPay - QR-code + biometric payment app, cutting payment time 50% (Flutter, Firebase). RedLife - Blood-bank inventory & donor-mapping platform, cutting stockouts 60% (Node.js, MySQL, Maps API).

TECHNICAL SKILLS

Languages:	Python, SQL, C/C++, JavaScript, Dart, HTML, CSS
Cloud & Data:	Snowflake, Informatica PowerCenter, AWS (EC2, S3), GCP, Azure, IICS
Frameworks & Libraries:	React, Next.js, Node.js, FastAPI, Flutter, OpenCV
Tools & Databases:	Git, Oracle SQL, MongoDB, Firebase, Supabase (PostgreSQL)
AI & LLM Tooling:	Claude, AI-assisted development workflows (design -> build -> debug -> ship)

EDUCATION

Bachelor of Technology, Computer Engineering (Honors in Cyber Security)

2021 - 2025

Don Bosco Institute of Technology, Mumbai

CERTIFICATIONS & VIRTUAL PROGRAMS

Anthropic Claude Certifications: Claude Certified Developer | Claude Certified Architect - Professional | Claude Certified Associate
Google AI/ML Virtual Internship - AICTE-Eduskills (Apr-Jun 2024): Developed and optimized ML models using Python, Google Colab, and GCP.
Forage Job Simulations (Apr 2024): BCG - GenAI Chatbot | Amazon - Elastic Beanstalk | Goldman Sachs - Governance Analyst | Accenture - Agile Java Dev | Walmart - DS & DB Design | TCS - IAM

POSITIONS OF RESPONSIBILITY

Chairperson

2022 - 2025

ACM-DBIT & Teknack Gaming Studio

- Led a 30-member team and organized 12+ events (including Teknack for three consecutive years), increasing engagement by 60%; grew online visibility and follower count by 225% and membership by 90% through a targeted digital strategy and student-led workshops.
